

Maximize your take-home income with a Flexible Spending Account

Your flexible spending account (FSA) is a special account that allows you to use your pre-tax dollars to pay for eligible medical expenses. This means you can save money on your taxes while also covering your medical needs. For example, you can use your FSA to pay for things like copayments, deductibles, and out-of-pocket maximums. You can also use it for things like vision care, dental care, and over-the-counter medications. The best part is that you can use your FSA for as long as you need it, so you can get the most out of it. To learn more about how to set up and use your FSA, contact your HR department or visit our website.
